(54) SKIN COSMETIC

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a skin cosmetic having excellent skin protecting effects and yet improving effects on chapped skin and moisture retaining ability.

SOLUTION: This skin cosmetic contains (A) a water-swelling clay mineral having 1-5,000 nm average particle diameter by a dynamic light scattering method, ≥ 30 mV absolute value of zeta potential by an electrophoretic scattering method and $\geq 90\%$ purity by powder X-ray diffraction method and (B) a low-molecular betaine.

LEGAL STATUS

[Date of request for examination] 26.12.2001

[Date of sending the examiner's decision of rejection] 25.11.2003

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]

[Date of extinction of right]
